TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

1 Executive Summary

This document sets out

- the strategy for the TIMBUS project’s internal and external dissemination and training activities for the whole duration of the project, from April 2011 to March 2014,
- detailed trainings planning for Year 2 (April 2012 to March 2013),
- reporting on dissemination and training activities for Year 1 (April 2011 to March 2012).

The plan specifies the project’s communication, dissemination and training objectives and the key messages which should be promoted in all external communication processes.

The document also includes a detailed and formal dissemination plan that contains the strategy that will be employed to meet these objectives, including the communication channels to be utilised, the relevant information requirements, responsibilities and an indication of frequency and timings of dissemination activities, the stakeholder groups with which the project will engage and the roles and responsibilities of TIMBUS participants. Tasks, Milestones and a timeline are defined and will be updated and expanded upon as the project progresses.

Developing the Dissemination/Standardisation Plan has helped bring a consistent, and importantly, a shared sense of purpose to all TIMBUS partners about what is the problem TIMBUS addresses and how it will do it.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

2 Introduction

The TIMBUS project on “Digital Preservation for Timeless Business Processes and Services” is a large-scale pan-European project co-funded by the European Union under the Seventh Framework Programme (FP7) and coordinated by SAP Research, Belfast. TIMBUS brings together 12 national European industrial organisations, research institutions and SMEs.

It focuses on **resilient business processes**. It will make the execution context, within which data is processed, analysed, transformed and rendered, accessible over long periods. Furthermore, continued accessibility is often considered as a set of activities carried out in the isolation of a single domain. TIMBUS, however, considers the **dependencies on third-party services, information and capabilities** that will be necessary to validate digital information in a future usage context.

TIMBUS will deliver

- **processes** and **methods** for digitally preserving business processes,
- a flexible and extensible software **architecture** that supports the major technical components and prototypes from TIMBUS,
- intelligent **tools** and **technologies** to support digital preservation of business processes,
- **use cases** to guide the development of and with which to validate TIMBUS products. They are
 - engineering services and systems for digital preservation,
 - civil engineering infrastructures,
 - eScience and High Energy Physics.

to ensure

- **continued access to services,**
- to **produce the context** within which information can be **accessed, properly rendered, validated and transformed into knowledge.**

This approach extends traditional digital preservation approaches (e.g. Strodl, Petrov, Rauber, 2011) by introducing the need to analyse and sustain accessibility to business processes and the supporting services, and it aligns preservation actions with enterprise risk management (ERM) and business continuity management (BCM). The complexity and scale of enterprise business processes makes TIMBUS exceptionally relevant.

Effective Dissemination and Training activities will ensure the widest possible adoption of these results in the user community as well as enabling commercial tool and service providers to compete in a new market place for differentiated preservation services and tools.

WP3 is the Dissemination and Training component of the TIMBUS project. Its purpose is to raise awareness of TIMBUS, engage and involve prospective users of TIMBUS, and to maximise adoption of TIMBUS methodology, technology, and services. This will be achieved through a variety of communication channels,

D3.2_M12_DisseminationPlanIter1.docx	Dissemination Level: RE	Page 2
--------------------------------------	-------------------------	--------

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

such as internet presence, representation in standards bodies, publications and presentations at regional and international forums, training events and demonstrators. It will form constructive partnerships with EU and other digital preservation projects, TIMBUS partner institutions, funding bodies and wider intermediaries and influencers, such as trade and professional bodies in target territories.

WP3 will draw on the findings of research conducted in WP2 (Exploitation) to inform outreach activities. Demonstrators and case studies will be deployed as part of the training program to support users embedding TIMBUS in their organisations. The two work-packages will collaborate in building a central resource of institutional and intermediary contacts which the project can draw on for input to TIMBUS development.

This document sets out planned dissemination and training activities for the project duration.

While this document covers partner internal training and dissemination activities it does not extend to internal project communications in TIMBUS.

For more information on the background of the project as well as further details on work packages, please refer to Annex I - “Description of Work” of the original project contract.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

3 Workpackage Partners

The Digital Preservation Coalition (DPC) leads this work package with input from the project partners. WP3 will also be guided by the external Technical Advisory Board (TAB) (TIMBUS Description of Work, Page 38 ff, <http://timbusproject.net/about/project-governance>) consisting of interested experts from differing industry sectors.

Table 1 lists WP3 contacts by workpackage.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

4 Dissemination Principles

Wherever possible, research results will be communicated for the external awareness creation and knowledge building within the targeted user and scientific communities of the European Union. The communication should guide and prepare potential users for the benefits and potential of the expected outcomes of the TIMBUS project.

4.1 Mission Statement

Dissemination is responsible for the communication on the project and its results, both to the internal audience, the scientific community and the potential business users of the TIMBUS project. Hence all partners of this project are aware of and committed to a proper communication of the project results. It is the principle of all dissemination activities to use research results to create value within the targeted communities of the European Union and to lead industries at the leading edge within the global market place.

4.2 Dissemination and Training Objectives

The objectives of the TIMBUS dissemination and training strategy are:

1. to foster project internal communication, cohesion and information exchange,
2. to raise stakeholder awareness of the benefits TIMBUS products provide,
3. to promote TIMBUS results and inform stakeholders of significant milestones reached,
4. to make TIMBUS products available to the community,
5. to maximise adoption of TIMBUS products
 - a. of TIMBUS methodology, technology, and services,
 - b. of TIMBUS specifications in appropriate standards and regulatory bodies,
6. to provide sustainable training material that can be used past the end of the project,
7. to collaborate and align TIMBUS results with external initiatives and, possibly, form alliances,
8. to manage external expectations of TIMBUS,
9. to support exploitation
 - a. through dissemination and training activities that lead to the successful exploitation of TIMBUS products,
 - b. to use outreach events as an opportunity for open dialogue with key stakeholders and user communities to gather requirements and to understand the impact of emerging technological trends on them, and adjust TIMBUS tools and services accordingly.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

5 Key Messages

The following are TIMBUS' key messages to be used in all dissemination activities.

- A. TIMBUS is addressing the challenge of long-term digital preservation for business processes and services.
- B. TIMBUS analyses and recommends which aspects of a business system should be preserved for the long-term and how to preserve them.
- C. TIMBUS is extending existing research and experience in risk and business continuity management and aligning these with digital preservation research.
- D. TIMBUS is developing a framework of methodologies, tools and services to support organisations that have the need to safeguard processes and services over the long term.
- E. TIMBUS will create value within the targeted communities of the European Union and disseminate its results to industries at the leading edge within the global market place.
- F. TIMBUS' work on understanding and enabling process preservation will demonstrate the digital preservation benefits to a new range of users beyond memory institutions, to include, for example, the manufacturing and service industry.
- G. TIMBUS is working proactively to establish partnerships with institutions, companies and projects engaged in providing digital preservation and business continuity tools and services.
- H. TIMBUS is applying a novel approach to a very challenging research area and is producing valuable contributions within its research area.
- I. Led by Europe, our TIMBUS industry partners, SMEs and research partners contribute to a global network of digital preservation expertise.
- J. TIMBUS is a strategic project co-funded by the European Union under the Seventh Framework Programme.

The long-term time is defined to be

- as long as necessary to provide access to the business process,
- enduring changes in the underlying political, economic, social, technological, environmental and legal environment.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

6 Stakeholders

It is important to understand the project’s internal and external stakeholders in order to engage successfully with them. Requirements of significant stakeholder groups will be a key consideration when producing dissemination and training outputs throughout the project. This section

- analyses potentially interested user industries and fields of science and engineering,
- analyses the roles of stakeholders within their organisations,
- analyses their potential interests,
- analyses the stakeholder groups, their definition, example organisations and their position within an impact matrix,
- matches the stakeholder groups against their interests, TIMBUS objectives for engaging with them, and the key messages to be used in these communications.

Considerable effort has already been made in Year 1 to engage with a variety of the identified stakeholder groups. These are documented in Deliverable 2.1 (Exploitation Plan Iter. 1) and in Appendix A.

6.1 Potential TIMBUS User Industries

The training will address stakeholders from a large spectrum of potential industries by liaising with Internal Business Units of the large consortium partners, including:

- Industry and service companies involved in the different sectors represented by the case studies
 - Engineering Services and Systems for Digital Preservation,
 - Civil Engineering Infrastructures,
 - eScience and High Energy Physics.
- Financial and Public Services:
 - Banking and Finance,
 - Defence & Security,
 - Education & Research,
 - Government,
 - Healthcare,
 - Insurance,
 - Memory Institutions (Libraries, Museums and Archives)
 - Public Sector.
- Manufacturing:
 - Aerospace & Defence,
 - Automotive,
 - Chemicals,

D3.2_M12_DisseminationPlanIter1.docx	Dissemination Level: RE	Page 8
--------------------------------------	-------------------------	--------

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

- Construction & Operations,
- Consumer Products,
- Engineering,
- Fashion and Retail,
- High Tech,
- Industrial Machinery & Components,
- Life Sciences,
- Mining,
- Oil & Gas.
- Service:
 - Business Consultancy,
 - Document Management,
 - Insurance,
 - IT Services/Software,
 - Legal Services,
 - Media, Press and Publishing,
 - Professional Services,
 - Telecommunications,
 - Transportation & Logistics,
 - Utilities.

6.2 Potential TIMBUS User Roles

The potential users of TIMBUS processes, methods and tools include

- Business Continuity Managers/Planners (managerial),
- Risk Managers/Planners (managerial),
- Product Architects (technical),
- Software Service Engineers (technical),
- Professional Escrow Service Providers (technical),
- Digital Preservation Officers (managerial and technical).

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

6.3 Potential Stakeholder Interest in TIMBUS

The potential users of TIMBUS processes, methods and tools inevitably have different interests in TIMBUS and its activities and outcomes. Some of the most important interests are:

- **Strategic direction:** How TIMBUS outcomes influence the strategic direction of an organisation,
- **Organisational impact:** What impact using the TIMBUS approach might have on an organisation,
- **Project Progress:** How the TIMBUS project progresses, where difficult research areas or quick win opportunities are identified,
- **Tools, services and infrastructure:** Availability of TIMBUS products,
- **Research:** TIMBUS research results,
- **Competitive position:** How TIMBUS products influence an organisation’s competitive position,
- **Partnership/collaboration:** Where opportunities for partnerships and collaborations lie.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

The power/impact matrix below is used to analyse the importance of each stakeholder to the project and the potential impact of the project on them, which determines the level and type of stakeholder management and communication activities. Looking only on the horizontal plane, we see that the further to the right a stakeholder is positioned in the matrix the more impact TIMBUS will have on them. Looking only on the vertical plane, we see that the further up a stakeholder is positioned in the matrix the more impact the stakeholder will have on the TIMBUS project.

It is important to note that stakeholders may move up or down the matrix as the project progresses and the matrix, therefore, needs to be revisited during the project. Stakeholders can and should enhance and even alter the course of the project.

Table 4: Stakeholder power/impact matrix

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

7 Communication Channels and Responsibilities

TIMBUS will seek many opportunities to disseminate information about the project, its progress and its results. The communication will be different for different communication channels. Communication should happen whenever there is something relevant to say with respect to the stakeholders' goals, (Section 6.3), the project's objectives (see Section 4.2) and the project's key messages (see Section 5). The communication will be at a detail relevant to the communication channel and audience.

This section

- analyses the general dissemination approach,
- analyses the general communication channels,
- analyses responsibilities, content and dissemination frequencies arising from the Consortium Agreement, the Grant Agreement and the stakeholder analysis.

7.1 Dissemination Approach

In order for the dissemination to be effective, an integrated approach will be necessary, combining templates, guidelines and approval processes on one side with a communication platform, publication, event participation and release plans on the other. This requires a combined effort of project management, the dissemination workpackage, and workpackage management of the research workpackages.

TIMBUS researchers, project management and the WP3 workpackage are responsible for seizing opportunities to present and promote dissemination of TIMBUS through the printed and spoken media. If a participant obtains contact with an interested stakeholder but is not able to meet the interest himself, the stakeholder should be referred to TIMBUS project management who will then handle the contact.

Dissemination opportunities will be promoted by the Programme, the Commission, a project cluster or any cross-programme actions.

Feedback will be encouraged. Contact information, in the shape of the project website address <http://timbusproject.net> and contact mail address info@timbusproject.net, will be provided with any written and spoken communication. Emails sent directly to info@timbusproject.net will be received by project management who will either respond or redirect the email to the relevant contact person in TIMBUS.

WP3 is responsible for measuring the achievement of the Dissemination and Training objectives. There will be evaluation of dissemination activities, for example monitoring of bibliometric indicators, analysis of press coverage and feedback from training/workshop/conference sessions. Specific success criteria and measures will be defined and monitored as appropriate.

Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

7.2 Communication Channels

The communication channels that TIMBUS will use in order to disseminate information fall into two categories:

- Communication channels set up and controlled by the project,
- Communication channels set up and controlled by external stakeholders.

Table 5: Communication channels

	Communication channels set up and controlled by the project	Communication channels set up and controlled by external stakeholders

7.3 Responsibilities, Content and Dissemination Frequencies

7.3.1 Project roles

- Project Participant – any staff member employed in the TIMBUS project,
- Project Partners – called ‘grant beneficiaries’, mainly private or public organisations, and exceptionally individuals, chosen by the European Commission for their capacity to implement the projects concerned. (http://ec.europa.eu/grants/introduction_en.htm),
- Project Management: Combines ‘Project Management Execution’ and ‘Coordination of Administrative Activities’ from the TIMBUS Description of Work, Page 38 et sqq.; also called ‘Board’ in the Consortium Agreement,
- Project Coordination Committee (PCC) – also called ‘General Assembly’ in the Consortium Agreement,
- Work package Leader,
- Technical Advisory Board (TAB).

7.3.2 Responsibilities defined in the Consortium Agreement (CA)

The responsibilities are guided by the Consortium Agreement. Excerpts of relevant text follow.

3.2.1.2 The General Assembly shall be responsible for the overall direction of the Project, and specifically, subject to the relevant provisions of the GA, for: ...

(h) deciding upon the plan for using and disseminating Foreground.

3.3.1.3 The Board shall be responsible for making the proposal to the General Assembly on the

D3.2_M12_DisseminationPlanIter1.docx	Dissemination Level: RE	Page 19
--------------------------------------	-------------------------	---------

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

following topics: ...

(d) implementing Article II.12.11 of the GA and proposing press releases and (without prejudice to Section 4.4) joint publications by the Parties with regard to the Project; ...

3.3.2.6 In the cases of Sections 3.3.1.3, (a), (c), (d), (e), (f) and (j), decisions shall be taken by a majority of 75% of the votes of the Board members present or represented by proxy at a quorate meeting, provided that in case of Section 3.3.1.3 (a), (d) and (e) a Board member who represents a Party whose scope of work, time for performance, costs, Project Share or liabilities would be changed, or whose information would be published, disclosed or disseminated, or whose name would be included in a press release, may veto such decisions on reasonable grounds.

3.4.3.3 Each Party agrees:

...

(c) not to use, in the execution of the Project, any third party materials, unless all of the other Parties have beforehand accepted such use in writing. Any third party material issued to the Project by a Party shall be clearly identified and marked as "THIRD PARTY MATERIAL", and shall be provided to the other Parties with the source of such third party material and any license and other terms of use relating to such material. No Party will be under any obligation to accept from another Party for use or otherwise any third party material hereunder or under the GA. Third party materials as used herein shall include, without limitation: code downloaded from the internet, whether or not it contains a copyright notice; information received from another person or entity

4.4 Publications, press releases, contributions to standards and reports to the Commission

¹

The beneficiaries shall, throughout the duration of the project, take appropriate measures to engage with the public and the media about the project and to highlight the financial support of [the Union] [Euratom]. Unless the Commission requests otherwise, any publicity, including at a conference or seminar or any type of information or promotional material (brochure, leaflet, poster, presentation etc), must specify that the project has received research funding from [the Union] [Euratom] and display the European emblem. When displayed in association with a logo, the European emblem should be given appropriate prominence. This obligation to use the European emblem in respect of projects to which [the Union] [Euratom] contributes implies no right of exclusive use. It is subject to general third-party use restrictions which do not permit the appropriation of the emblem, or of any similar trademark or logo, whether by registration or by any other means. Under these conditions, beneficiaries are exempted from the obligation to obtain prior permission from the Commission to use the emblem. Further detailed information on the EU emblem can be found on the Europa web page.

Any publicity made by the beneficiaries in respect of the project, in whatever form and on or by whatever medium, must specify that it reflects only the author's views and that the [the Union] [Euratom] is not liable for any use that may be made of the information contained therein.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

4.4.1 Publications

Dissemination activities including but not restricted to publications and presentations shall be governed by the procedure of Article II.30.3 of the EC-GA subject to the following provisions. No Party shall have the right to publish or allow the publishing of any data which constitutes Foreground, Background or Confidential Information of another Party, even where such data is amalgamated with such first Party's Foreground, Background or other information, document or material. Any such publication without such other Party's written agreement justifies, in addition to any other available remedies, objection to the publication by the Party concerned in accordance with GA Article II.30.3.

A copy of any proposed publication in connection with or relating to the Project shall be sent to the Co-ordinator and by the Co-ordinator to the Parties at the earliest time possible. Any of the Parties may object to the publication within thirty (30) days after receipt of a copy of the proposed publication on any of the following grounds: (i) that they consider that the protection of the objecting Party's Foreground would be adversely affected by the proposed publication, (ii) that the proposed publication includes the Confidential Information of the objecting Party, or (iii) the publication of such information would be contrary to the legitimate interests of the objecting Party. The proposed publication shall not take place until the expiry of the above period of thirty (30) days. In the absence of any objection within the above mentioned period, it is deemed that the Parties agree to the proposed publication. Following the end of the above mentioned period, the Co-ordinator shall inform the Parties whether or not any objection has been received.

In the event that an objection is raised on any of the above defined grounds within the above period of thirty (30) days, the Party proposing the publication and the Party objecting shall seek in good faith to agree on a solution on a timely basis whereby such objection is resolved. The Parties undertake to cooperate to allow the timely submission, examination, publication and defence of any dissertation or thesis for a degree which includes their Foreground or Background. However, confidentiality and publication clauses have to be respected.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

4.4.2 Contributions to Standards

Except as explicitly provided in Annex I of the GA, or as otherwise stated in Annex 7 to this CA, no Party shall have any obligation pursuant to this CA to make any contribution for incorporation of its own Foreground in any European or other standard. No Party shall have the right to contribute to a standard or allow the contribution to a standard of any data which constitutes Foreground, Background or Confidential Information of another Party, even where such data is amalgamated with such first Party's Foreground, Background or other information, document or material. Any such contribution without such other Party's written agreement justifies, in addition to any other available remedies, objection to the contribution by the Party concerned in accordance with GA Article II.30.3.

A copy of each proposed contribution of Foreground to a meeting of a standards organisation included in the schedule distributed by the Board in accordance with Section 3.3.1.3 (j), (hereinafter referred to as a "Scheduled Meeting"), for the purpose of incorporation in a standard, shall be distributed to the Parties, by the Party proposing to submit the contribution, no later than thirty (30) days prior to the date of the meeting ("Review Period").

Any Party may submit a written objection, to such contribution to the Party proposing the standards contribution and to the Board, within a period of twenty (20) days, ("Objection Period") after receipt of a copy of the proposed contribution on either or both of the following grounds: (i) that the objecting Party considers that the protection of the objecting Party's Foreground would be adversely affected by the proposed contribution; (ii) that the proposed contribution includes the Foreground, Background or Confidential Information of the objecting Party. The proposed contribution shall not be made until the expiry of the above period of twenty (20) days. Any objection accompanied by evidence indicating, prime facie, that the objection is justifiable, is hereinafter referred to as a "Justifiable Objection". In the absence of any Justifiable Objection on either or both of the above grounds within the above mentioned period, it is deemed that the Parties agree to the proposed contribution. Following the end of the above mentioned period, the Board shall inform the Parties whether or not any objection has been received and whether such objection(s) is/are Justifiable Objections. In the event that a Justifiable Objection is raised on either or both of the above defined grounds within the above period of twenty (20) days, the Party proposing the publication and the Party objecting shall seek in good faith to agree a solution on a timely basis whereby the Justifiable Objection is resolved. No such standards contribution shall be made in respect of which any Justifiable Objection remains unresolved.

For all other proposed contributions of Foreground for the purpose of incorporation in a standard, the above procedure of this Section 4.4.2 shall apply accordingly, except that the Review Period shall be forty (40) days and the Objection Period shall be thirty (30) days.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

4.4.3 Disclaimer and marking of Confidential Information provided to the Commission
 In addition to the GA Article II.4.6:

(a) all information provided to the Commission, and press releases shall have a valid disclaimer saying:

“The information in this document is provided "as is", and no guarantee or warranty is given that the information is fit for any particular purpose. The above referenced consortium members shall have no liability for damages of any kind including without limitation direct, special, indirect, or consequential damages that may result from the use of these materials subject to any liability which is mandatory due to applicable law. Copyright 201.. by ... [Annotation: please list all partners who contributed to the respective project deliverable].”;

and

(b) Confidential Information provided to the Commission will be marked, stating the information is confidential and may be used only for information purposes by European Community Institutions to whom the Commission has supplied it.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

7.3.3 Responsibilities defined in the Grant Agreement (GA)

The responsibilities are also guided by the Grant Agreement. One example is listed here. Please see the full text for complete information.

II.30. Dissemination
1. Each beneficiary shall ensure that the foreground of which it has ownership is disseminated as swiftly as possible. If it fails to do so, the Commission may disseminate that foreground.
2. Dissemination activities shall be compatible with the protection of intellectual property rights, confidentiality obligations and the legitimate interests of the owner(s) of the foreground.
3. At least 45 days prior notice of any dissemination activity shall be given to the other beneficiaries concerned, including sufficient information concerning the planned dissemination activity and the data envisaged to be disseminated. Following notification, any of those beneficiaries may object within 30 days of the notification to the envisaged dissemination activity if it considers that its legitimate interests in relation to its foreground or background could suffer disproportionately great harm. In such cases, the dissemination activity may not take place unless appropriate steps are taken to safeguard these legitimate interests. The beneficiaries may agree in writing on different time-limits to those set out in this paragraph, which may include a deadline for determining the appropriate steps to be taken.
4. All publications or any other dissemination relating to foreground shall include the following statement to indicate that said foreground was generated with the assistance of financial support from [the Union] [Euratom]: The research leading to these results has received funding from the [European Union] [European Atomic Energy Community] Seventh Framework Programme ([FP7/2007-2013] [FP7/2007-2011]) under grant agreement n° [xxxxxx]. Any dissemination activity shall be reported in the plan for the use and dissemination of foreground, including sufficient details/references to enable the Commission to trace the activity. With regard to scientific publications relating to foreground published before or after the final report, such details/references and an abstract of the publication must be provided to the Commission at the latest two months following publication. Furthermore, an electronic copy of the published version or the final manuscript accepted for publication shall also be provided to the Commission at the same time for the purpose set out in Article II.12.2 if this does not infringe any rights of third parties.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities. Iteration 1

	Communication channel	Responsibility	What	When
Internal	Dissemination evaluation	Project management and WP3 define success criteria and metrics. WP3 evaluates the impact of TIMBUS dissemination and training events.	Metrics to evaluate dissemination and training activities (e.g. bibliometric indicators, analysis of press coverage and feedback from training/workshop/conference sessions)	During / at conclusion of dissemination activities
Publicity Materials	Spoken or written releases to the media (project)	WP3 and project management write and issue press releases. Workpackage leads or project participants provide input or confirm contents. One project partner in each country has the press releases translated and distributed in their individual countries. Project management and the WP3 collaborate in overseeing this activity, and where practical will monitor the effectiveness of the communication. Press releases will be targeted at: <ul style="list-style-type: none"> • Technology, science, data processing, library and information management, industry, and business media • Publications aimed at Chief Information officers • Relevant European Commission titles 	Major project developments Events Updates on progress	Upon major project developments, events

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Communication channel	Responsibility	What	When
Materials Scientific publications (regional and international) <ul style="list-style-type: none"> • Conference papers • Journal or magazine papers • Articles in international digital preservation or business continuity newsletters • Research posters 	Project management identifies possible venues (see Section 10.1 for the list). Project participants create and submit publications. Project participants co-ordinate publications with WP3 and project management. WP3 disseminate publications on request and on the project website timbusproject.net.	Relevant TIMBUS results, objectives	As milestones and results are achieved

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

	Communication channel	Responsibility	What	When
Materials	<p>Popular publications (regional and international)</p> <ul style="list-style-type: none"> Articles in popular publications 	<p>Project management, WP3 and project participants identify possible venues</p> <p>Project participants create and submit publications.</p> <p>Project participants co-ordinate publications with WP3 and project management.</p> <p>WP3 disseminate publications on request and on the project website timbusproject.net.</p>	<p>The problem of timeless business processes, how TIMBUS is addressing this and progress/results.</p>	<p>As opportunity arises</p>
Materials	<p>Spoken or written releases to the research area</p> <p>specific media</p> <ul style="list-style-type: none"> Articles Interviews AV webposts 	<p>Project management, WP3 and project participants identify possible venues</p> <p>Project participants issue releases to the media.</p> <p>Project participants co-ordinate publications with WP3 and project management.</p> <p>Workpackage leads provide input or confirm contents.</p> <p>WP3 disseminate media releases on request and on the project website timbusproject.net.</p>	<p>The problem of timeless business processes, how TIMBUS is addressing this and progress/results.</p>	<p>As opportunity arises</p>

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities. Iteration 1

	Communication channel	Responsibility	What	When
Social Media	<p>Discussion lists/groups/forums</p> <p>Weblogs</p> <p>Online event calendars related to digital preservation</p> <p>Mailing lists distributing information to international community of digital preservation researchers</p>	<p>Project participants, project management and WP3 contribute on external social media.</p> <p>Project participants contact individuals who publish on digital preservation and business continuity management on external social media and keep them informed about relevant project progress and news.</p> <p>Project management and workpackage leads notify WP3 of any TIMBUS events and confirm event details. WP3 submits information about TIMBUS activities to related online event calendars and mailing lists.</p>	<p>Discussion of relevant issues</p> <p>Major project developments</p> <p>News items relevant to TIMBUS;</p> <p>Updates on progress</p> <p>Announcements of training events, joint conferences etc.</p>	<p>As opportunity arises</p>
Events	<p>Conference presentation</p>	<p>Project management identifies possible venues (see Section 10.1 for the list).</p> <p>Project participants create presentations.</p> <p>Project participants co-ordinate presentations with WP3 and project management.</p> <p>WP3 disseminate presentation slides, posters, demos on request and on the project website timbusproject.net.</p>	<p>Relevant TIMBUS results, objectives</p>	<p>Upon acceptance of publication</p> <p>Upon invitation</p>

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities. Iteration 1

	Communication channel	Responsibility	What	When
Events	Workshops	WP3, workpackage and task leads organise and execute thematic TIMBUS outreach workshops.	Technical issues on project task level	As opportunity arises
Events	Poster sessions	WP3 and project participants identify opportunities for displaying TIMBUS project and research posters. WP3 and project participants identify opportunities display TIMBUS project and research posters.	Technical issues on project task level	As opportunity arises
Events	Representation at industry or trade show events	Project management identifies possible venues (see Section 10.2 for the list). Project participants plan and execute participation at industry and tradeshow events. Project participants co-ordinate presentations with WP3 and project management.	Presentations (talks or displays) of project goals, results and opportunities for involvement	As opportunity arises
Partner-ships	Representation on standards bodies <ul style="list-style-type: none"> • General assemblies • Working groups 	Project management identifies possible venues (see Section 10.3 for the list). Project participants participate in meetings. Project participants create written proposals. Project participants write minutes and post on the project Wiki for WP3 http://timbus.teco.edu/projects/wp3/wiki/WP3_Top_Page	Insights gained in TIMBUS	Regular presentation

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

	Communication channel	Responsibility	What	When
Partnerships	National and international networks – including partners’ contacts	Project participants present and disseminate information about TIMBUS to their contacts in national and international networks.	Relevant news items and dissemination materials.	As opportunity arises

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities. Iteration 1

8 WP3 Derivative Products

In addition to the primary dissemination products, TIMBUS also produces derivative, reusable products for WP3. They are listed in the Table 7.

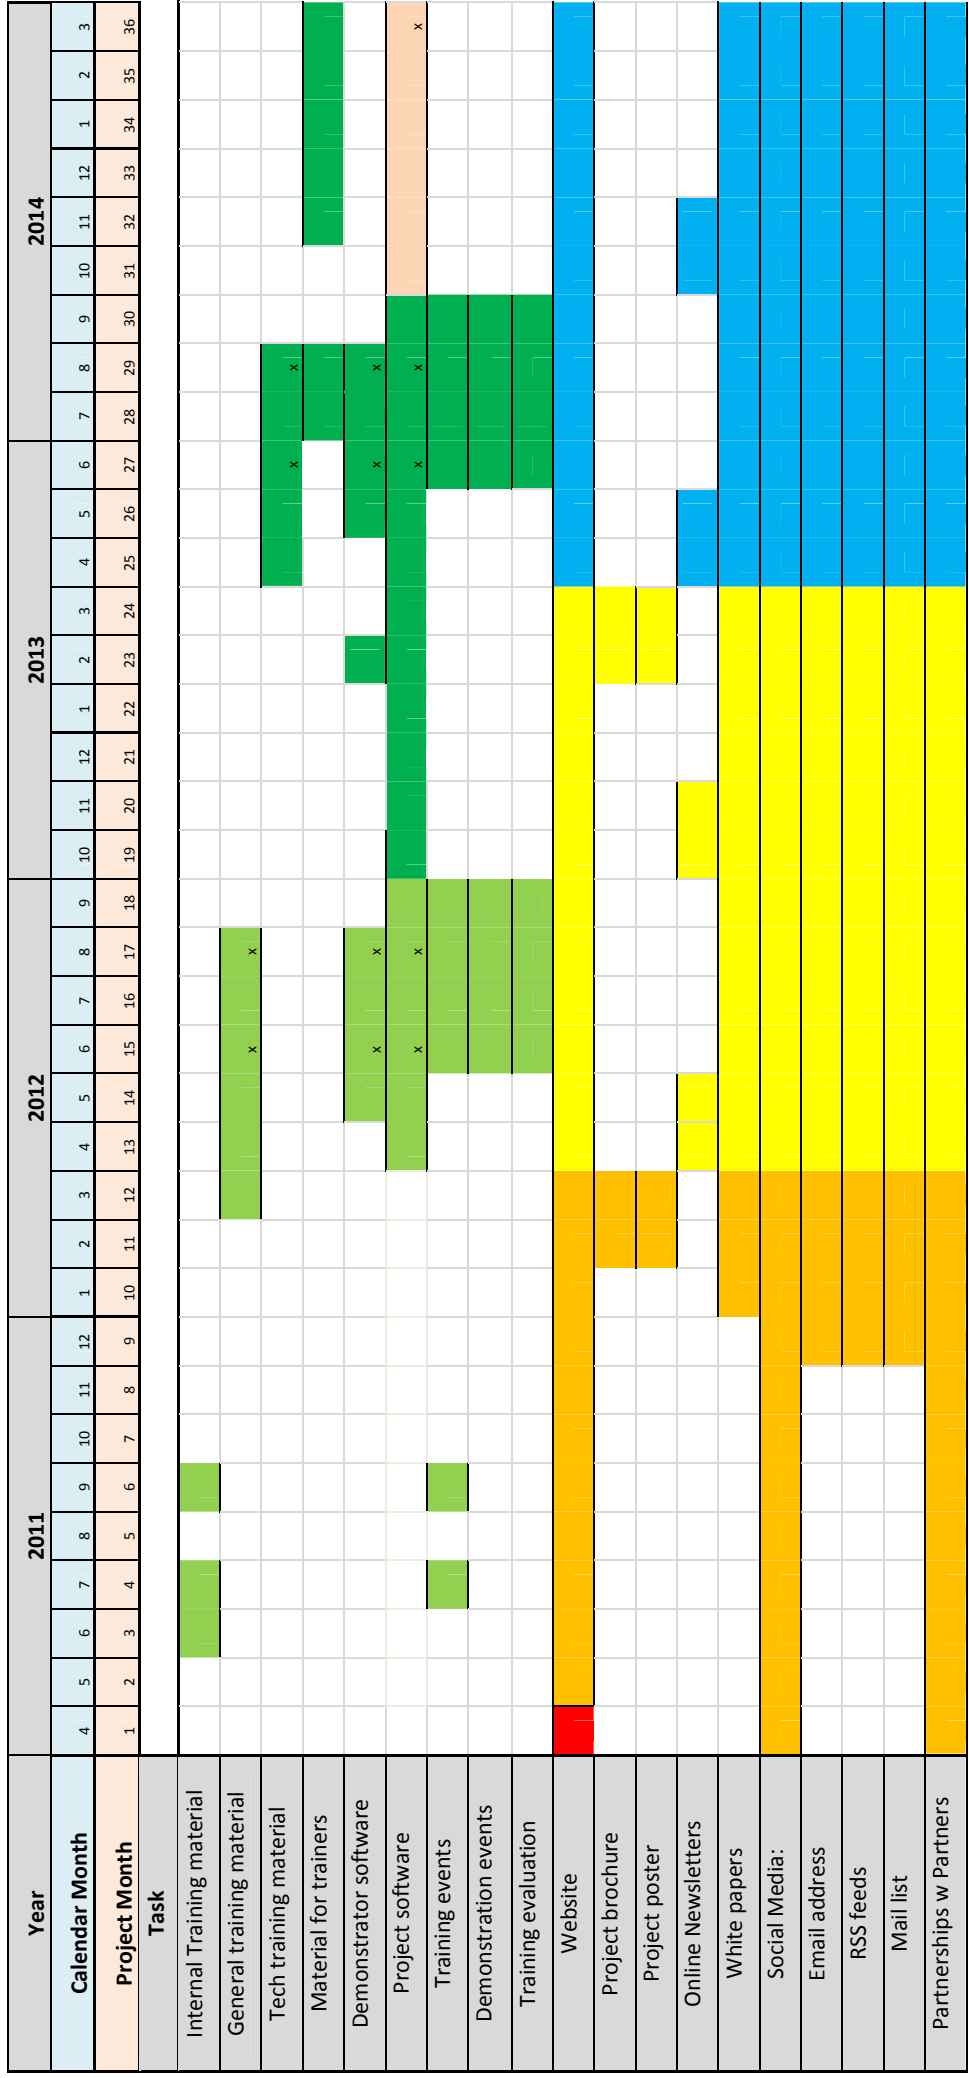

Table 7: WP3 derivative products

Product	Explanation
Branding	Report and slide templates for Open Office and Microsoft Office to be reused by all project participants. They are located at http://timbus.teco.edu/projects/timbus/repository/show/General/Templates on the project-internal SVN
Media contact lists	A list of popular and subject-specific media contacts for dissemination of project press releases or popular media articles.
User contact list	A list of user stakeholders for TIMBUS products for WP2 and WP3 (confidential)
Mailing list	A list of interested contacts for distribution of newsletters and events announcements. Obtained through RSS feed and registration on http://timbusproject.net/ (confidential)
Listserv mailing lists	A list of distribution lists for dissemination (see Appendix B, Relevant Distribution Channels)

TIMBUS	WP3-- Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

The Gantt chart in Table 9 displays the times at which effort is needed to set-up or maintain a communications channel. The colours in the chart connect the task with the workpackage deliverables in Table 8.

Table 9: WP3 (Dissemination and Training) Gantt chart.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities. Iteration 1

The current estimate indicates that there is not enough effort allocated to WP3. This is recorded as a project risk. Possible risk mitigation is to transfer effort from other work-packages or to cut dissemination output to a sustainable level.

Table 11 shows how the effort for WP3 is mapped to the Deliverables as laid out in the DoW and in the Project Plan

Table 11: WP3 effort by deliverable and partner organisation

Deliverable	Effort DoW	Effort Project Plan	SAP	SBA	SQS	ITM	INESC-ID	iPharro	Intel	CMS	LNEC	KIT	LIP	DPC

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

11 Conclusion

This document sets out

- the strategy for the TIMBUS project’s internal and external dissemination and training activities for the whole duration of the project, from April 2011 to March 2014,
- detailed trainings planning for Year 2 (April 2012 to March 2013),
- reporting on dissemination and training activities for Year 1 (April 2011 to March 2012).

The plan specifies the project’s communication, dissemination and training objectives and the key messages which should be promoted in all external communication processes.

The document also includes a detailed and formal dissemination plan that contains the strategy that will be employed to meet these objectives, including the communication channels to be utilised, the relevant information requirements, responsibilities and an indication of frequency and timings of dissemination activities, the stakeholder groups with which the project will engage and the roles and responsibilities of TIMBUS participants. Tasks, Milestones and a timeline are defined and will be updated and expanded upon as the project progresses.

Developing the Dissemination/Standardisation Plan has helped bring a consistent, and importantly, a shared sense of purpose to all TIMBUS partners about what is the problem TIMBUS addresses and how it will do it.

Appendix A demonstrates the breadth and amount of TIMBUS dissemination activities in Year 1 in mostly quantitative metrics. In Year 2 we hope to also qualitatively assess our effort through feedback from event attendees. Year 2 will enable us to disseminate the research results and tools coming out of Year 1 and Year 2 in additional ways.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Annex

The annex consists of 2 parts. The first annex lists the dissemination activities that have happened in the TIMBUS project from April 2011 to February 2012. The second annex lists identified partners, organisations and venues for TIMBUS activities in the second year.

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

A. Dissemination Activities Register for TIMBUS Year 1

This appendix documents the dissemination and training events that have taken place in the TIMBUS project between April 2011 and February 2012.

31-Oct-11	Brussels, Belgium	Business Continuity Management (BCM)		Conceptual Modelling researchers and practitioners		world	Phil Taylor	Conference on Conceptual Modeling (ER 2011) http://er2011.ulb.ac.be/full-program	Keynote Speaker; BCM is very important for large enterprises across many different lines of business. A key factor for BCM is being able to understand enough about business processes so that accurate continuity plans can be deployed and monitored. Current research is addressing the needs of decision makers by providing simulation systems involving historical and near real-time data that help mitigate the risk of inappropriate and ineffective business continuity plans. Digital Preservation Crash Course, 19 July 2011, Glasgow

Attendants: Phil Taylor, Daniel Simon, Finian Rogers, Andrew McHugh, Sharon McMeekin (APARSEN), William Kilbride, Angela Dappert

Emerging Standards		
- OAIS		William Kilbride
- PREMIS		Angela Dappert
- TRAC and other certification methods		William Kilbride
- DRAMBORA and Risk Assessment in Preservation		Andrew McHugh
Emerging practice and trends in research		
- What people actually do in preservation		Angela Dappert
- Migration, emulation and bit preservation		Sharon McMeekin
- Automation and scalability		William Kilbride
- Capacity building and policy		William Kilbride
- Other trends from APARSEN DoW		Sharon McMeekin
Main players in preservation		
- Memory institutions (who preserve because they have to)		William Kilbride
- Data owners (those who want to exploit data for some purpose)		William Kilbride
- Vendors, developers and researchers (who make tools and promote them)		William Kilbride
- Regulated institutions (Banks, public institutions, pharmaceuticals etc.)		William Kilbride

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Other projects	
- PLANETS	Angela Dappert
- SCAPE and OPF	Angela Dappert
- Other projects from FP7	William Kilbride
- Other projects of note	all

Table 18: TIMBUS training subjects delivered in Year 1 in Lisbon

Digital Preservation Crash Course, 14 September 2011, Lisbon

Attendants: 21 TIMBUS partners and students at the University of Lisbon, William Kilbride, Angela Dappert

Introduction to Digital Preservation	William Kilbride
What people actually do in preservation	Angela Dappert
OAIS	William Kilbride
PREMIS	Angela Dappert
TRAC and other certification methods	William Kilbride
DRAMBORA and Risk Assessment in Preservation	Angela Dappert
Brief introduction on migration, emulation and bit preservation; Automation and scalability; Capacity building and policy	William Kilbride

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

TIMBUS Standards Activities

From 14 February		Essam Shehab e.shehab@cranfield.ac.uk, who is responsible on costs issues in the ENSURE project	EU	ENSURE / TIMBUS discussions on how to include cost issues into the preservation decision	Has agreed to discuss these issues with TIMBUS	Michael Nolan, Daniel Burda; Finian Rogers, Philip Mondor, Roxana Belecheanu, Stephan Strodl	Intel, SAP, SBA
From February 2012	Collaboration through other Intel work	Doug Davis, IBM	EU	Doug Davis is developing a CDMI implementation on top of Openstack Swift. Openstack Swift is to be used in TIMBUS together with a data container such as CDMI for storage of the source objects plus their metadata. Intel would like to first, influence and then, leverage this work for use in TIMBUS as it also intersects some of Intel's planned work in the FP7 Fi-Ware project.		Michael Nolan	Intel
From February 21, 2012	email	Raivo Ruusalepp <raivo@eba.ee>, University of Tallinn, Andrew McHugh <Andrew.McHugh@glasgow.ac.uk>, University of Glasgow	EU	Raivo and Andrew contacted us to start discussions on how the TIMBUS enterprise risk management aligns with their work on DRAMBORA		Roxana Belecheanu, Christine Grimm	SAP

Zeitung der Westfälischen Wilhelms - Universität Münster	Wednesday, November 09, 2011	Wissen Leben. Zeitung der Westfälischen Wilhelms-Universität Münster	Haltbare Daten. Juristen an zukunftsweisendem EU-Forschungsprojekt beteiligt	http://www.uni-muenster.de/unizeitung/2011/6-30.html	Juliane Albrecht	Silviya Yankova, Barbara Kolany	ITM	Wilhelms - Universität Münster	Germany	The TIMBUS response: 'Das EU Forschungsprojekt "TIMBUS" erforscht die Archivierung ganzer Geschäftsprozesse. Dies ist ein stark erweiterter Fokus gegenüber bisherigen Archivierungsansätzen, welche sich vor allem mit der Präservierung von Daten und Dateien auseinandersetzen. Eine der Herausforderungen ist, die archivierten Geschäftsprozesse zu einem Zeitpunkt weit nach der Archivierung in einer neuen Umgebung wieder zu aktivieren. Die präservierten Informationen müssen in einer unbekanntem Zukunft konsistent wieder hergestellt werden können. Das ist zum Beispiel notwendig, um im Falle eines schwerwiegendem Fehlerhalten eines Systems die Ursache festzustellen. TIMBUS erforscht unter anderem, welche Dokumentationen, Systeme und Abhängigkeiten in welcher Form gespeichert werden müssen. Teil des Archivierungsprozesses ist, effektiv zu identifizieren, welche Informationen nicht mehr gebraucht werden. Besonderes Augenmerk liegt in TIMBUS auf der Untersuchung vertraglicher und gesetzlicher Regelungen, die oftmals nicht konfliktfrei zum Archivierungsgedanken sind. Derzeit befindet sich TIMBUS in seiner Anfangsphase.'

Relevant Conferences and Journals

There are several different communities that will be highly impacted by the project results, including general communities of practice in: digital preservation, service oriented computing, virtualisation, business continuity management, and so forth. Specific contributions are shown in Table 27.

Table 27: Conferences and journals targeted

Conference / Journal	Year	No. Papers	Attendee	Possible Subject(s)	Notes
eChallenges e-2012 Conference & Exhibition http://www.echallenges.org/e2012/default.asp?page=home	2012			Any TIMBUS subject

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Standards Participant	Role in Standards	TIMBUS Relevance	Links
SQS Software Quality Systems AG	Founding Member	Contributing to Security and Authorisation process for execution and exhumation	www.isseco.org
ISSECO International Secure Software Engineering Council	Member	Defining and establishing guidelines (incl. awareness) for IT industry in Germany/Europe	www.bitkom.org
BITKOM Bundesverband Informationswirtschaft, Telekommunikation und neue Medien e.V.	Member	Contributing to validating and verifying activities in DP (expediency, executing, exhumation)	www.isqj.org
ISQJ International software quality institute	Member	Contributing to effort estimation for DP expediency and for defining metrics for controlling DP	www.dasma.org
DASMA Deutschsprachige Anwendergruppe für Software-Metrik und Aufwandsschätzung	DPC		
PREMIS PREServation Metadata: Implementation Strategies	Member	PREMIS is an international de-facto standard defining metadata for use in digital preservation. The PREMIS Data Dictionary captures context information for digital assets. TIMBUS can usefully extend this to services and processes.	http://www.loc.gov/standards/premis/v2/premis-2-1.pdf
Participant PREMIS Environment Working Group	DPC , Intel, KIT Member	PREMIS has started a temporary working group on environment modelling (=context) in November 2011 whose goal is to change the way environments are serialized in PREMIS and to improve their modelling.	-

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Table 33 shows which standards and bodies can be targeted for further dissemination of TIMBUS results.

Table 33: Proposed involvement in relevant standards and bodies

Standards	Proposed Role in Standards	TIMBUS Relevance	Links
Participant	SAP		
BSI (BS 25999)	Contributor	Business Continuity Management. Process for digital preservation of business processes and the software/technology stack that supports them.	http://www.bsigroup.com/en/Assessment-and-certification-services/management-systems/Standards-and-Schemes/BS-25999/
SNIA DMF ILM Maturity Model	Contributor	Contribution of Maturity Levels for Legalities LifecycleManagement.	
Participant	SQS		
ISO/IEC 29.119	Contributor	DP-requirements as additional quality attributes for holistic software testing	
Participant	Intel		
Openstack Swift		Swift is a highly available, distributed, eventually consistent object/blob store. Organisations can use Swift to store lots of data efficiently, safely, and cheaply. Openstack Swift is to be used in TIMBUS. Together with a data container such as CDMI on top of it, it would be a good basis for TIMBUS virtualization.	http://swift.openstack.org/
SNIA: SIRF Self-contained Information Retention Format (SIRF)	Member of SNIA	SIRF is a container metadata standard being developed by the Storage Networking Industry Association (SNIA) with the intention of creating a standardized vendor-neutral storage format that will be interpretable by future preservation systems and that will simplify and reduce the costs of digital preservation. Simona Cohen from IBM Israel is offering to collaborate with TIMBUS on this.	http://www.snia.org

---------------------------------	-------------------------	----------

TIMBUS	WP3– Dissemination and Training
Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Standards	Proposed Role in Standards	TIMBUS Relevance	Links
SNIA CDMI Cloud Data Management Interface	Member of SNIA, influence and possibly use the standard	CDMI is an international standard that specifies the interface to access cloud storage and to manage the data stored therein. OCCI compliant. SNIA focuses on Cloud storage and interoperability standards. SNIA advance IT technologies, standards, and education programs for all IT professionals. Made up of some 400 member companies spanning the global storage market, the SNIA connects the IT industry with end-to-end storage and information management solutions.	http://www.snia.org/cdmi
IVI IT-CMF	Member of IVI	The IT-CMF (IT Compatibility Maturity Framework) defines over 30 critical processes (CPs) which assess the maturity of the IT capability within an organisation to meet business demands. IVI (Innovation value institute) governs the development of the framework, whose goal is to help industry think about IT capabilities in a business-orientated way and systematically implement changes to IT management to increase the business value deriving from IT. The IT-CMF CP's are under constant evaluation and development. At present, an existing CP, KAM (Knowledge Asset Management) is being split into two CPs which will deal with different aspects of information lifecycle management. TIMBUS has a strong link to IVI through Intel and as lifecycle management is also a key element of long-term preservation, Intel will investigate how the new IVI CP's take into account extremely long retention requirements of data.	http://ivi.nuim.ie/ITCMF/

Deliverable	D3.2: Dissemination/Standardisation Plan & Activities, Iteration 1

Standards	Proposed Role in Standards	TIMBUS Relevance	Links
Infrastructure/Network standards (such as TOGAF, IEEE 802.x), storage standards (ANSI, NFS), security (NIST, ISO 17799), data management standards, possibly even operating system, middleware/messaging and database standards		There are some more standards that Intel MIGHT look at to consider the possible impacts over long periods to time to our archived business processes in the areas of infrastructure/Network standards (such as TOGAF, IEEE 802.x), storage standards (ANSI, NFS), security (NIST, ISO 17799), data management standards, possibly even operating system, middleware/messaging and database standards which could all evolve radically to the point where our archived BP could not be re-run in the future.	
Participant	TIMBUS Tasks		
German amendment of the IP-Right called “ 3. Korb zum Urheberrecht ”	TIMBUS T4.3 Contributor	Nestor proposed to include digital preservation as a topic, but it was not contained. They spoke about the topic of orphan works. Right now initiative of this amendment has been put on ice. But as soon as we know that the discussion goes on we would like to contribute.	http://www.bibliotheksportal.de/themen/recht/urheberrechtsreform.html
OMG, or similar	TIMBUS T7.2 Member / Contributor	Task 7.2 will develop Service Interface Standards for Digital Preservation (M12-M24). As Task 7.2 only starts up in M12 the appropriate target standards body still needs to be identified.	http://www.omg.org/

ODCA	Observer	ODCA has over 300 member Organisations. They came together to deliver a unified voice for emerging data center and cloud computing requirements. Our mission is to speed the migration to cloud computing by enabling the solution and service ecosystem to address IT requirements with the highest level of interoperability and standards.	http://www.opendatacenteralliance.org/
OASIS Organization for the Advancement of Structured Information Standards	Observer	OASIS is a not-for-profit consortium that drives the development, convergence and adoption of open standards for the global information society. OASIS promotes industry consensus and produces worldwide standards for security, Cloud computing, SOA, Web services, the Smart Grid, electronic publishing, emergency management, and other areas. OASIS open standards offer the potential to lower cost, stimulate innovation, grow global markets, and protect the right of free choice of technology.	http://www.oasis-open.org/org
ECLC The Enterprise Cloud Leadership Council	Observer	The ECLC is the TM Forum's group of "buy-side" companies which are the elite of cloud computing, the proven leaders and technology visionaries. The ECLC is a practical, results-based body comprised of many of the world's largest multi-national companies and government bodies, dedicated to sharing actionable best practices, standing up real-world reference implementations and advancing the adoption of enterprise cloud operating models. The ECLC's mission is to accelerate the realization of a new era of IT transparency, efficiency and agility	http://www.tmforum.org/EnterpriseCloudBuyers/8009/home.html

Related Organisations and Projects

TIMBUS will seize relevant opportunities to collaborate with other digital preservation and business continuity management initiatives.

Table 35 Related organisations

Group	URL	Description
Open Planets Foundation	http://www.openplanetsfoundation.org/	Established to provide practical solutions and expertise in digital preservation, building on the research and development outputs of the Planets project.
JISC (Joint Information Systems Committee)	http://www.jisc.ac.uk/	JISC champion digital technology in UK higher education. JISC offers leadership and support to UK educational organisations at a local, national and international level. We provide resources, knowledge and expertise that colleges and universities would struggle to source individually due to cost and resource. By staying abreast of developments across information and digital technology we help the UK education community make investment decisions that ensure they deliver the learner experience their students demand.
DPC (Digital Preservation Coalition)	http://www.dpconline.org	The Digital Preservation Coalition fosters joint action to address the urgent challenges of securing the preservation of digital resources in the UK and to work with others internationally to secure our global digital memory and knowledge base. Established as a not-for-profit membership organisation the coalition provides a mechanism by which members can work together to realise the opportunities of long term access.
DCC (Digital Curation Centre)	http://www.dcc.ac.uk/	The Digital Curation Centre is the UK's leading hub of expertise in curating digital research data.

TIMBUS	WP3– Dissemination and Training
