TIMBUS

TIMELESS BUSINESS

Sponsored by the European Commission Directorate for Information Society

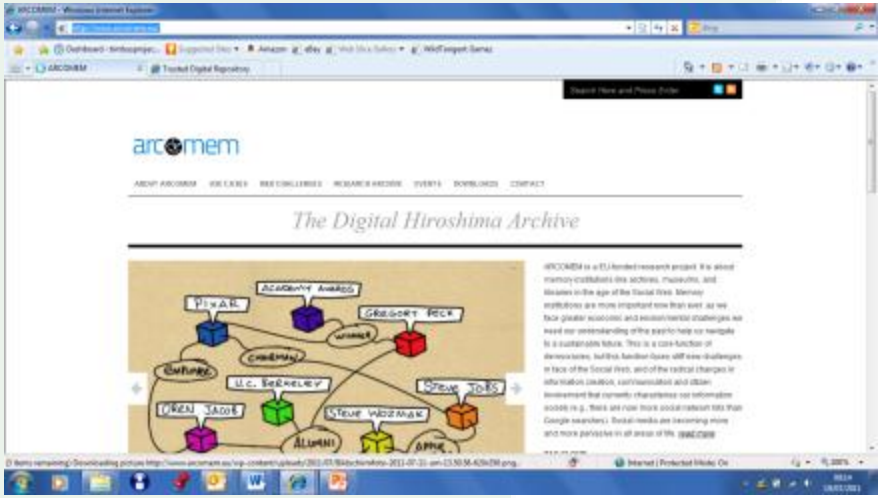
FP7 and other relevant current projects in Digital Preservation

William Kilbride
william@dpconline.org

ARCOMEM

‘leverage the wisdom of the crowd for content appraisal, selection and preservation in order to create and preserve archives that reflect collective memory and social content perception, thus closer to current and future users’

http://www.arcomem.eu/



Blog4Ever

‘create preservation management and dissemination facilities for weblogs. These facilities will be able to capture the dynamic and continuously evolving nature of blogs their network and social structure and thus exchange of concepts and ideas they foster’

http://blogforever.eu/

DPOE

Ensure

‘improve long term usability for data held by organisations with commercial interests. Use cases for this research are in the domains of aerospace, health care, finance and clinical trials’

KEEP

‘will create portable emulators enabling access to and use of digital objects stored on out-dated computer media. The emulators will ensure accurate rendering of both static and dynamic digital objects.

ODE

PrestoPrime

‘ addressing long term preservation of and access to digital audio-visual content. Research will result in a range of tools and services delivered through the networked Competence Centre PrestoCentre’
